As part of a scientific team investigating time travel, you have been given the unique opportunity to be the first member of the team to voyage through a time machine that your team has recently finished creating, to anytime in Earth's past or future for a 24 hour time period. In your **one to two page, double-spaced, typed** plan include responses to all of the following:

1. To what time period in history would you like to travel and why?
2. Describe what you would do during the 24 hour time period.
3. Would you be an observer, a participant, or both? How would you decide?
4. Would you change history or not, and what might happen in the past or future if you did?
5. What personal possessions would you take with you and why? Could those possessions change the past or future, and if so how?
6. What technological, social, and economic problems might you likely encounter and how would you solve them? Remember that help is not available from your scientific team, and that you have no way of communicating with them.
7. What other considerations are necessary on your journey?

You may include pictures and/or information obtained from additional sources, however you **must** include all references used, even those listed by the instructor, and **type** this assignment in order to receive credit!
